GITHUB PORTFOLIO

github.com/SauodAzad/my-projects

TECHNICAL SKILLS

Android (Kotlin / Java)

Full-Stack Web (PHP, JS)

MySQL & Relational
Design

HTML5, CSS3, Bootstrap

Object-Oriented Design

Software Quality & Testing

Git & Version Control

Profile

Motivated **BS Software Engineering student (2022–2026)** at Riphah International University with hands-on experience across the complete software development lifecycle — from rigorous requirements gathering and database modeling through to deployment. Proficient in native Android development using Kotlin and Java, and full-stack web engineering with PHP, MySQL, JavaScript, HTML, and CSS. Delivered a complete final-year freight booking platform (*E-Cargo-Bility*) covering user, driver, and booking management with real-time trip matching. Comfortable working independently or within collaborative teams, quick to master modern frameworks, and dedicated to delivering clean, scalable code.

Education

BS Software Engineering (BSSE)

2022 – 2026

Riphah International University, I-14 Campus, Islamabad

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Software Requirements Engineering, Software Quality Engineering, Software Design & Architecture, Mobile Application Development, Web Engineering, Human-Computer Interaction.
- **Final Year Project:** E-Cargo-Bility — Full-Stack Cargo Booking Web Platform.

Core Competencies

- ✓ Requirements Gathering & Documentation
- ✓ Software Quality Engineering & Testing
- ✓ Database Design & 3NF Normalization
- ✓ Time Management & Meeting Deadlines
- ✓ Native Android App Development
- ✓ Full-Stack Web Development
- ✓ Problem Solving & Analytical Thinking
- ✓ Team Collaboration & Peer Reviews

Technical Expertise

- **Programming Languages:** Kotlin, Java, PHP, JavaScript, SQL, HTML5, CSS3.
- **Frameworks & APIs:** Android SDK, Bootstrap, AJAX, RESTful API Integration.
- **Databases:** MySQL, Relational Database Normalization, Query Optimization, NoSQL Basics.
- **Engineering Practices:** Test Case Design, Functional Testing, Defensive Programming, OOP Principles.

Key Projects

E-Cargo-Bility — Full-Stack Cargo Booking Web Platform

FINAL YEAR
PROJECT

PHP, MySQL, JavaScript, HTML5, CSS3, AJAX, Bootstrap

[View Repository on GitHub: SauodAzad/my-projects ↗](#)

- Designed and built an end-to-end cargo/freight booking platform using HTML, CSS, JavaScript, and PHP, covering the full workflow from customer request to trip completion.
- Modeled and implemented a normalized relational MySQL database to manage users, drivers, vehicles, bookings, and trip records.
- Built real-time trip request handling with driver matching logic, fare calculation, and booking status management.
- Developed separate user and driver interfaces with role-based access to relevant features and data.
- Conducted structured requirements gathering and analysis with stakeholders to define system scope and functionality.
- Applied software quality engineering practices, including test case design and functional testing, to validate core booking workflows.
- Documented system design, ER diagrams, and use cases as part of the final year project report.

Mobile Applications (Android)

NATIVE MOBILE APPS

Android Studio | Kotlin & Java

[View Android Projects on GitHub: SauodAzad/my-projects ↗](#)

- Built multiple native Android applications from scratch using Kotlin and Java in Android Studio.
- Designed intuitive UI/UX flows using activities, fragments, and navigation components for smooth screen-to-screen transitions.
- Implemented local and remote data persistence, connecting app interfaces to backend data sources for reliable storage and retrieval.
- Followed object-oriented design principles to keep code modular, reusable, and easy to maintain.
- Debugged and tested applications across different Android emulator configurations to ensure consistent behavior.

Achievements & Involvements

- Academic Performance:** Consistently maintained strong academic standing throughout the BSSE program at Riphah International University.
- Practical SDLC Delivery:** Applied structured SDLC methodology across coursework projects, from requirements analysis through testing and delivery.
- Proactive Learning:** Self-directed learner — proactively explored Kotlin, PHP, and MySQL beyond coursework to strengthen practical development skills.
- Community & Tech Discussions:** Active participant in university tech discussions and peer code reviews within the Software Engineering department.
